VICTORIA - NORTHERN,
WESTERN & SOUTH EASTERN

Webinar - Planning for Summer - Irrigation and Water Management

As crop growth and water use increase with the warmer weather, it's a good time to think about getting on top of irrigation management and reviewing your water availability.

Join this webinar, hosted by VegNET, for a Victoria specific focus on the summer weather outlook, water availability north of the divide and preparation of irrigation system.

Speakers and topics will include:

- **Graeme Anderson, Agriculture Victoria:** Climatic outlooks and available tools and resources for growers
- **George Warne, RMCG:** Water pricing and forecast, with a focus on irrigation regions north of the Great Divide
- **Kelvin Montagu, AHR:** Managing summer crop water demands - options for making the most of your irrigation water.
